

MOTIP Disc Brake Conditioner

Ord.-no.: 000278

Technical Information

Protect the disc brakes of your bike with MOTIP Disc Brake Conditioner. The spray prevents clamping and wear of the disc brakes on your bike and is resistant to chemicals, the weather, salt and weak acids and bases. Disc Brake Conditioner is a spray with high thermal stability to condition disc brakes. Disc Brake Conditioner ensures optimal braking capacity.

Quality & properties

- Prevents wear and sticking
- Excellent thermal stability
- Resistant to chemicals and weather influences
- Resistant to water, salt and weak acids and bases
- Excellent adhesion
- Directed jetspray

Physical & chemical data

- Base: Lithium grease / graphite
- Colourname: anthracite
- Smell: Characteristic
- Surfaces: Disc brakes (Bike)
- Minimum Working Temperature: 10 °C
- Maximum Working Temperature: 25 °C
- Vapour pressure: 3500/20 bar
- Storage stability: 10 y
- Content: 400 ML

How to use

- Before use, carefully read the directions on the packaging and act accordingly
- The aerosol should have room temperature
- Best processing temperature 5 to 30°C.
- Before use, shake the aerosol.
- Disassemble the brake pads. Clean the brake pads and the brake disc with MOTIP Brake Cleaner.
- The surface must be dry and free of grease. Apply the disc brake conditioner in a very thin layer by repeatedly, briefly pressing the nozzle.
- In order to obtain the optimum brake capacity, after assembly firmly brake a few times while biking.

Environmentally sound

European Aerosols is committed to apply formulations without restricted or critical ingredients and to achieve best possible performance. The caps and packagings are made of recyclable material.

Disposal

Only the completely emptied cans should be put into the recycling skip or appropriate container for reclaimable refuse. Cans which are not empty should be disposed off as "special refuse".

Marking/Labeling

All products made by European Aerosols comply with the actual labelling regulations according to Preparation Guideline 1999/45/EG. All aerosols correspond to TRGS 200 and TRG 300 as well as to aerosol guideline 75/324/EWG in the actually valid version.
