

**Your wholesaler
of bike parts
and accessories**

About Falko

Nice to meet you!

Falko BV is an international import and export company, specialized in the two-wheeler industry. Falko has almost 40 years of business experience in sourcing, developing and selling bicycle parts and accessories.

Our company can offer the customers a wide range of bicycle parts and accessories, all with our own brands and identity. Our team works daily on updating and improving our product range. We are constantly working on improving the value and quality of our services, thereby ensuring that our clients are actually receiving value for money.

Our source

Over 30 years' trading experience in Asia

Most of the products that Falko imports are produced in the Far East, like China, Sri Lanka, Taiwan and India. Our excellent contacts with factories - plus over 30 years of experience in importing products from Asia - mean we can offer excellent quality products at attractive prices.

By visiting these factories multiple times a year we maintain a strong relationship with our suppliers. Our complete product range meets the European quality standards because of the reliability of our suppliers and thanks to the experience and expertise of our purchase team and local agents.

Our products

Our brand or your brand

Our product range includes a variety of brands, each with their own 'look and feel'. On top of that, we can supply products with a private label which allows us to meet your company specific needs.

We can supply a number of articles without commercial packing, very easy to use, especially for the workshop or bicycle factories. A large proportion of our products are sold through private labels to customers all over the world. Falko works closely with wholesalers, factories and retail organizations, who sell or use the products under their own brand name.

Falko can do more than just handling the production of the goods. Based on the requirement, we work together with you right from the drawing board. We are also happy to assist in obtaining necessary certifications needed for your market.

ZP = Copper plain bearing*

ZU = PA plain bearing*

*More details on page 16 about these bearing systems

ZP

ZP-SYSTEM

ZP-System

Copper plain bearing

The unique bearing design includes the use of copper plain bearings, which ensure a very comfortable rotation around the axle. This A-quality bearing is innovative and offers maximum performance.

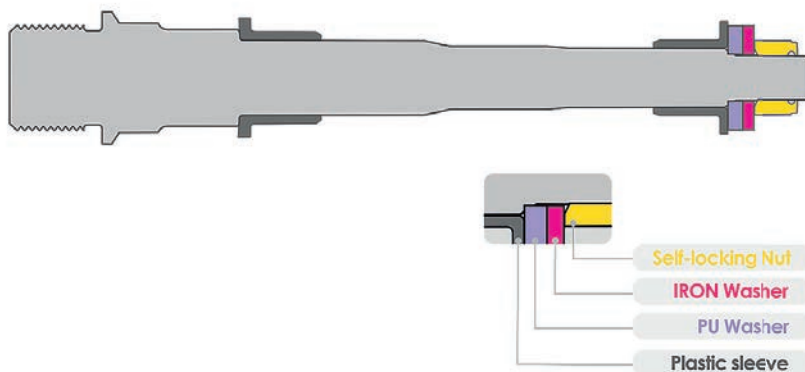

ZU

ZU-SYSTEM

ZU-System

PA plain bearing

The patented PA (highly wear-resistant plastic) bearing (ZU-bearing) ensures that the pedal rotates smoothly around the axle.

PERFORMANCE / Black

- Maximum braking performance, even on extreme descents!
- Long-lasting life thanks to the Semi Metallic compound
- Best brake control in all conditions
- Mud and rain resistant

RACE / Green

- Soft organic compound for racers!
- Aggressive braking power with comfortable lever feel
- Grips quickly and provides good controllability
- Noiseless

ELECTRIC / Blue

- Specially developed compound for E-bikes and heavy bikes!
- Very wear-resistant due to the Semi hard organic composition
- Very stable braking power in all circumstances
- Resistant to brake fading

Auto-click locks

A bit more convenient in use

The locks with the auto-click system closes with one simple click, without a key. You only have to push the lock pin into the lock housing and the lock will close automatically.

Furthermore, the lock pin automatically pops out of the lock case when the lock is opened.

One Genuine Smart Bike Taillight

- Bluetooth BLE4.0 Wireless Connectivity Technology.
- Remote controller: control rear light left/right turning instruction.
- Plastic material: PC+ABS.
- LED color: Red + Yellow.
- 8 Types of LED light Working Mode.
- 2 Laser lines, showing cycling safety zone.
- Can be connected with Finder Bike Computer; turning indicator controlled by bike computer, auto showing turn-by-turn signal.
- 2500Mah Battery; Normally ON mode can last about 10 hours;Flash mode can last about 15-20hours.
- Type-c Charging Interface, Input: DC 5V / 0.5A.
- 2 Fixed Positions, Under Saddle or On the Seat post.
- IPX6 Grade Waterproof.
- Package: Gift box, device: 305g, 139mm * 126mm *45.5 mm; 50pcs/CTN, 16.1kg

Wireless Control Turning Taillight

- Wireless Remote Control Turn-by-Turn
- Red+Yellow LED Light
- Laser to Light Indicate the Safety Area
- Day/Night Automatically Switch ON/OFF
- Remote Control Battery: CR2032
- Rear Light Brightness: 80LM
- Lithium Battery Capacity: 2000mAh
- Power: DC 5V 0.5A
- Waterproof: IPX4

Ride Smarter

First Wireless Smart Taillight Worldwide

Automatic Brake Detection function

- Red streamlined high-brightness LED.
- Brightness 35LUX, six flashing modes.
- Built-in 900 mAh rechargeable battery, can be used for more than 36 hours after fully recharged.
- Input: USB DC 5V 0.5A.
- Smart Brake Detection, Light up your way in the dark.
- Waterproof grade: IPX5.

Ride Safer

Super Power in Tiny Body

C4 Bike Computer Front Combination Light

- Aluminum body, High efficiency heat dissipation.
- Small size, easy to take;
- Cree XPE LED, brightness Max 60 Lux;
- Near and far optical double optical classes lighting system;
- Rechargeable battery; can use more than 4 hours.
- IPX6 waterproof can use in heavy rain environment.

PORTABLE MINI COMPRESSOR LYNX E-BLOW

WITH 2900 MAH BATTERY
FOR ALL TYPES OF VALVES

- Pumps effortlessly up to 10 bar
- Stops automatically when target pressure is reached
- Pump capacity of 40 litres per minute
- With torch function
- Can also be used as a power bank
- With user-friendly digital display

With this Lynx battery-powered air pump / portable mini compressor, you can effortlessly pump up any tyre to a maximum of 10 bar / 150 PSI. This powerful mini compressor has a battery capacity of no less than 3900 mAh, enabling it to achieve a pumping capacity of 40 litres per minute. On the top of the air pump, 2 LED lights are integrated, so the area around the valve can be illuminated.

This Lynx tyre pump comes standard with 4 adapters (for all valve types), USB cable and bag. The pump is adjustable in 4 different pressure units: PSI, Bar, KPA and Kg/cm2
