

MOTIP Contact Cleaner

Technical Information

Clean the electrical contacts in your car such as the battery with MOTIP Contact Cleaner. The Contact Cleaner is nonconductive and has various applications from batteries to mixing panels and switches. Contact Cleaner is nonconductive and non-corrosive, leaves no residue, has a powerful jet-spray and can be used in various positions.

Ord.-no: 290505, 090505

Quality & properties

High dissolving properties Powerful jetspray Leaves no residue Non-conductive and non-corrosive 360° valve

Physical & chemical data

How to use

Before use, carefully read the directions on the packaging and act accordingly. The aerosol should have room temperature. Best processing temperature 10 to 25°C. Before use, shake the aerosol for 2 minutes. Switch off electrical installations before treatment. Spray the parts to be treated until the contamination has disappeared. Contaminated contact cleaner should be regarded as chemical waste.

Only switch on the electrical installation after evaporation of the solvent (minimum of 15 minutes)

Environmentally sound

European Aerosols is committed to apply formulations without restricted or critical ingredients and to achieve best possible performance. The caps and packagings are made of recyclable material.

Disposal

Only the completely emptied cans should be put into the recycling skip or appropriate container for reclaimable refuse. Cans which are not empty should be disposed off as "special refuse".

Marking/Labelling

All products made by European Aerosols comply with the actual labelling regulations according to Preparation Guideline 1999/45/EG. All aerosols correspond to TRGS 200 and TRG 300 as well as to aerosol guideline 75/324/EWG in the actually valid version.

As of July 7, 2025 - This release replaces all eventually earlier issued versions.
